

ZONGZHEN (JACK) YANG

862.400.3570

jackyangzzh@gmail.com

[Personal Website](#) | [GitHub](#) | [LinkedIn](#)

A dedicated, detailed, and award-winning XR developer with more than six years of experience in building immersive and interactive virtual experiences. Extensively researched in vision and HCI fields, with expertise in virtual reality and augmented reality.

EDUCATION

University of Wisconsin-Madison | B.A. in Computer Science & B.A in Communication Arts
Carnegie Mellon University | National High School Game Academy
Seton Hall Preparatory School | National Honor Society member

August 2016 – June 2020
May 2015 – August 2015
August 2013 – May 2016

RESEARCH EXPERIENCE

Kats Laboratory of Applied Physics

Researcher (Matlab | Unity | Hyperspectral Imaging | Oculus)

October 2017 – Present
Madison, WI

- Responsible for devising chromatic adjustment algorithms with computer vision techniques on hyperspectral images to simulate color blindness.
- Excel in the development of an artificial intelligence algorithm to replicate human behavior during color vision deficiency tests such as Farnsworth-Munsell 100 Hue Test and D-15 Test; subsequently examine the accuracy of chromatic adjustment with 90% confidence.
- Accountable for programming virtual reality simulations to visualize research findings through color-calibrated Oculus Head Mounted Display (HMD); this has resulted in practical design implications for potential human vision enhancement optical lenses.

University of Wisconsin Computer Graphics Lab

Researcher (Unity | ROS (Robot Operating System) | HTC Vive)

September 2019 – May 2020
Madison, WI

- Constructed a virtual reality teleoperation system where users could remotely control robots via hand and arm gestures by passing ROS data between Unity and robot through network socket with little latency.
- Crafted a motion playback system with an intuitive user interface to dynamically replicate virtual robot arm movement; this was accomplished by interpolating robotic data from experiments in Unity that were used to analyze more than 15 lab experiments.

University of Wisconsin HCI Group, People and Robots Lab

Research Assistant (C | Python | Raspberry Pi)

April 2017 – November 2017
Madison, WI

- Constructed a collaborative filtering recommender system for children reading companion robots, resulting in a successful trial with eight families.
- Teamed effectively with mechanical engineering students to add speech recognition to robots using NLP techniques.

PUBLICATIONS

Accepted

- J. Salman, M. Gangishetty, B. Rubio-Perez, D. Feng, Z. Yu, **Z. Yang**, C. Wang, A. Shahsafi, D. Congreve, M. A. Kats, "Passive frequency conversion of ultraviolet images into the visible using perovskite nanocrystals," Journal of Optics, Vol. 23, No. 5, 054001 (2021)

In Preparation

- Z. Yang***, B. Rubio-Perez*, J. Salman, M. Frising, M. A. Kats, "Monte Carlo Simulations of the Farnsworth-Munsell 100 Hue Color Vision Test for Anomalous Trichromatic and Dichromatic Observers," (Spring 2022)
- Z. Yang**, B. Rubio-Perez, M. A. Kats, "Breaking Binocular Redundancy Through Virtual Reality," (Winter 2021)

Other

- Featured in: Cameron, Mike, "Effective Leaders: Four Attributes That Underpin The Core Characteristics of Effective Leadership," SpiritCast Network (2021)

PROFESSIONAL EXPERIENCE

Holos Inc.

AR/VR Interaction Engineer (Unity | Ultraleap | Blender)

February 2019 – Present
<https://holos.io/>

- Spearhead the building of an interactive, networked AR/VR content management and training simulation system, featuring hand tracking with integrated gesture recognition and simulated physics.
- Create prototypes and deploy key features, including multiplayer networking, 3D model processing, and virtual object manipulation interface; this resulted in winning a \$750,000 research contract with the U.S. Air Force and being accepted into the TechStars program.
- Formulate and implement new design decisions and product directions based on user testing observations.

Microsoft Mixed Reality

Open-Source AR/VR Developer (Unity | Ultraleap | Git)

March 2021 – Present
github.com/MixedRealityToolkit-Unity

- Add and maintain Ultraleap (Leap Motion) hand tracking support and demonstration projects for Microsoft's Unity Mixed Reality Toolkit (MRTK) project by contributing 4,000+ lines of code.
- Align with other developers to carry out bug fixes and repository documentation management.

TEACHING & ADVISING EXPERIENCE

CS 559: Computer Graphics

Fall 2019 & Spring 2020

Teaching Assistant (*THREE.js* | *GLSL Shader* | *Git*)

Madison, WI

- Tutored and supported over 350 students on course content and assignments for two semesters.
- Facilitated head faculty members in designing classroom materials, and also graded more than 550 student projects.

PROJECTS

Virtualso

January 2020 – Present

Founder & Developer (*Unity* | *OpenXR* | *AI*)

Madison, WI

- Develop virtual reality interview simulation; this involves users being interviewed by customizable conversational humanoid agents capable of making emotion-driven facial expressions and body gestures using Natural Language Processing (NLP) techniques.
- Implement a realistic virtual reality speech trainer where users upload their own slides and present to a room of artificial intelligent audiences capable of reacting via body gestures and eye contact.
- Receive very positive feedback from business school students who used the simulation to practice for job interviews and presentations.

PolySpace VR

September 2020 – August 2021

Founder & Developer (*Unity* | *Photon Networking* | *OculusVR*)github.com/Poly-Space-VR

- Established and developed PolySpace VR, an open-source virtual reality social platform that promotes small virtual gatherings and minimal latency performance across devices, where players are encouraged to create and submit their own spaces to be featured.
- Published and received positive reviews on the Oculus Store; garnered more than 1,000 downloads and 350+ active users.

LEADERSHIP ROLES

UpNote

February 2017 - January 2020

Founder (*Flutter* | *Firebase* | *Dart*)

Madison, WI

- UpNote is a B2C platform that enables venues and individuals to democratize music playlists and capture data on music preferences by allowing users to nominate songs through integration with their music streaming service of choice.
- Led a team of 3 developers to create a minimal viable product and recruited 4 local bars to participate in alpha testing.

CONFERENCES

- **Presenter & Exhibitor**, "Holos - the future of no-code, VR Training creation, and deployment," I/ITSEC 2021
- **Volunteer & Participant**, IEEE VR 2020 & 2021
- **Poster**, "Robot-assisted Reading among Elementary and Middle School Children," WISCIENCE Entering Research 2017

CERTIFICATIONS

University of California San Diego | Interaction Design Specialization (*In Progress*)

University of California San Diego | VR Development Professional Certificate

Georgia Tech | Human-Computer Interaction Professional Certificate

University of London | Virtual Reality Specialization

Udacity | Computer Vision Nanodegree

TECHNICAL SKILLS

C# | C++ | Python | MATLAB | JavaScript | Unity | Unreal | Leap Motion | OpenVR | OpenGL | MRTK | ARKit | ARCore | Blender | Git
